Riley Morgan

BACKEND PYTHON ENGINEER

riley.morgan@example.test | +1 (555) 010-2026 | Portfolio: example.test

PROFESSIONAL SUMMARY

Backend engineer building dependable APIs and data services. Enjoys clean service boundaries, pragmatic automation, testable code, and improving reliability for growing products.

CORE SKILLS

Python | Flask | Django | SQL | PostgreSQL | MySQL | REST API | Docker | AWS

PROFESSIONAL EXPERIENCE

Backend Engineer | Juniper Systems | 2023 - 2025

Designed Python REST API services with Flask and PostgreSQL for billing and account workflows. Added request validation, structured logging, and automated tests, reducing repeat support incidents by 28%. Deployed containerized services to AWS.

Software Engineer Intern | Cloudline Works | 2022 - 2023

Implemented Django endpoints and MySQL queries for an internal inventory tool. Collaborated through code review and added Docker-based local development instructions.

SELECTED PROJECT

Campus services API | Python, Flask, SQL, Docker
Built an API for event listings and registrations with pagination, input validation, and repeatable local containers.

EDUCATION

B.E. in Software Engineering | Pinecrest College | 2022
Relevant study: Operating Systems, Networks, Database Design
